Consent to Treat

Orville R. Weyrich, Jr, PhD, NMD, BCN, ABAAHP 4 Health and Wellness

Patient Name: Date of birth/_/ Today's Date/_/	
I request treatment by Dr. Orville Weyrich, Jr., PhD NMD, a licensed Naturopathic Medical Doctor in the State of Arizona, by any appropriate method that is within his scope of practice, including (but not limited to) nutritional, botanical and pharmaceutical agents, manipulation, exercise, acupuncture, IV, IM, and SC injections, biofeedback, electrical modalities, cold laser, homeopathy, mind/body techniques, and minor surgery. I understand that the methods listed above may cause pain or superficial lesions such as bruising, and may require touching or other invasion of my personal space; that I have the right to request discontinuance of treatment at any time. I understand that while Dr. Weyrich's scope of practice overlaps with other health care professionals such as MD, DO, DC, PsyD, MSW, LAC, PT, and LMT, he does not possesses any of these designations.	
Dr. Weyrich's education includes BA in Chemistry, Math, and Physics (triple major magna cum laude; Union College of Kentucky), AM in Chemistry (Duke University), PhD in physical organic chemistry (University of Tennessee, Knoxville), ABD in Computer Science and Engineering (Auburn University), Naturopathic Medical Doctor (Southwest College of Naturopathic Medicine, 2007), and additional graduate level studies in Math and Statistics (Grand Canyon University). He is Board Certified in Neurofeedback (BCN) by the Biofeedback Certification International Alliance, and a Board Certified Health Practitioner Diplomate in the Clinical Science of Anti-Aging by the American Board of Anti-Aging Health Practitioners (ABAAHP).	
Dr. Weyrich has earned an Epigenetic Level 1 Coaching Certification from Apeiron Academy and offers epigenetic coaching to patients as well epigenetic coaching	
Dr. Weyrich has received training in Pain Medicine from the American Academy of Pain Medicine, but there is currently no board certification process for NMD. His license does not allow him to prescribe opiate narcotics, benzodiazepines, gabapentin, trazodone Valium, or Soma. Therefore, Dr. Weyrich does not offer conventional pain-management services, but does offer various complementary and alternative modes of treatment (physical medicine, electro-magnetic therapies, biofeedback, neurofeedback, acupuncture	
herbs, nutrition, etc) in coordination with your conventional doctors. Or. Weyrich has received the standard training in Mind-Body medicine as part of his NMD degree, and provides limited counseling services. He has been trained as a "Lay Counselor" by Scottsdale Bible Church (AZ) and a "Crisis-line Counselor" by Contact Teleministries (TN), and has obtained additional training from Christian Leaders Institute. He has no professional counseling certification beyond his basic NMD degree. Prayer is available at no cost upon request.	
Generally speaking, insurance will pay for drug prescriptions written by Dr. Weyrich, but may impose limits, require co-pay, restrict prescriptions to drugs listed on their list of approved drugs (formulary), or require submission of chart notes. Insurance companies rarely pay for compounded medications such as low dose naltrexone (LDN), poio-identical hormones, or drugs used "off-label."	
Most insurance (in particular all HMOs, AHCCCS, Medicare, Medicaid, Tri-Care, or other government-sponsored program) will NOT pay for office visits, treatments, lab tests or radiology exams ordered by Dr. Weyrich. You either have to pay out of pocket for these services when required, or request a doctor "in network" of your insurance company to order these. Dr. Weyrich will prepare a "coordination of care" letter to request such services from your in-network health care provider upon request as a paid service, but there is no guarantee that the HCP will sign-off on the requests.

Version 2023

Dr. Weyrich does NOT participate in any insurance program. Some private insurance plans will reimburse the patient for "out of network services" provided by Dr. Weyrich, but it is the patient's responsibility for submitting statements for reimbursement. No representation is made that third parties will reimburse all or part of services/products billed or that coding complies with third-party regulations. All amounts billed remain the responsibility of the patient. ☐ Payment of all new charges are expected at time of service. Prescriptions will be withheld by the front office until scheduled payments are made. Dr. Weyrich does not accept deferred payment for personal injury cases. ☐ Due to current inflationary trends in the economy, prices are subject to change. Multi-session discounts may be available, which will lock in the price for the sessions purchased in advance. Phone consultations for coaching clients are billed via PayPal. There is no cost to schedule an appointment. ☐ I understand that Dr. Weyrich follows HIPAA privacy guidelines and will only disclose protected healthcare information to third parties as authorized by a records release form signed by the patient, or as required by law. Records pertaining to private-paid services will not be released to insurance companies without a records release form signed by the patient, but in order to obtain certain services from insurance companies (e.g. prior authorization), Dr. Weyrich may be required to allow disclosure. ☐ This constitutes disclosure of Dr. Weyrich's HIPAA policy and the patient acknowledges that he/she has been given a copy thereof. ☐ Due to legal constraints, Dr. Weyrich does guarantee response to text or voice messages to his cell phone. For reliable communications, please leave a message on his answering service, (888) 391-0414. ☐ Due to legal constraints, all patients being treated by Dr. Weyrich must have a designated primary care physician (PCP), and Dr. Weyrich must coordinate care with that PCP (exchange SOAP notes and discuss treatment). If the patient has no other PCP, then Dr. Weyrich legally must assume the role of PCP and provide full standard of care (which includes general health screening and treatment, or appropriate referral), at additional cost to the patient. Dr. Weyrich may decline service if in his opinion he cannot meet this legal requirement. ☐ In order to access many insurance services, your PCP acts as the "gate-keeper." Since Dr. Weyrich is not recognized by most insurance companies (especially HMOs, AHCCCS, Medicare, Medicaid, Tri-Care, or other government-sponsored programs), Dr. Weyrich may not be able to function effectively as your PCP. Dr. Weyrich aims to provide treatment that maximizes a patient's ability to engage in the activities of daily living (and participate in the workplace). This usually does not mean that pain is completely eliminated, since higher doses may interfere with proper mentation and reflexes for safely engaging in these activities. Dr. Weyrich expects that patients will actively engage in such exercises, nutritional programs, and other treatments as Dr. Weyrich deems to be appropriate, and that patients will not simply rely on drugs for their treatment. Dr. Weyrich expects that patients will follow directions given for use of medications, patients will not take any medications not approved by Dr. Weyrich, and patients will not in any way sell/give/loan/etc their medications to other persons. Patient agrees to keep Dr. Weyrich informed of any medications or supplements or changes thereof prescribed by other health care providers or self-prescribed. Dr. Weyrich will NOT replace lost drugs. Patients are responsible for securing their medications from theft and misuse by others, including children in the household. Failure to follow these principles can result in a patient being IMMEDIDIATELY dismissed from Dr. Weyrich's practice or Dr. Weyrich refusing to prescribe additional medications to the patient. Understood and agreed by patient: Print name: Sign name: ___ _ Today's date: _____
